

If you open this application for the first time, you need to allow privacy location access requirement. After that, you will enter main page, a map, a search tool and a list of artworks sorted by distance grouped by building. If you click the artwork cell, you will enter the second page, Details page, which include name of artwork, picture, name of artist, year and introduction. If you want to view artworks by pins, you can click emoji and then click i button. You will view all artworks of this building after doing that. In addition, if you want to filter artworks, you can type the name of the artwork you want to view on search tool. Next, a list of artworks contains character you typed will show.

If you rotate your devices, different view will show like below.
